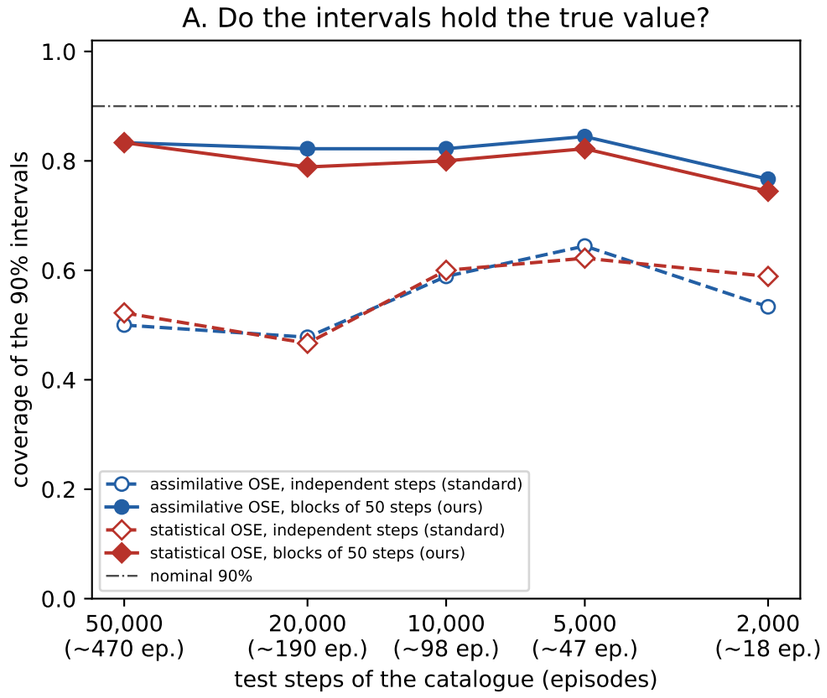
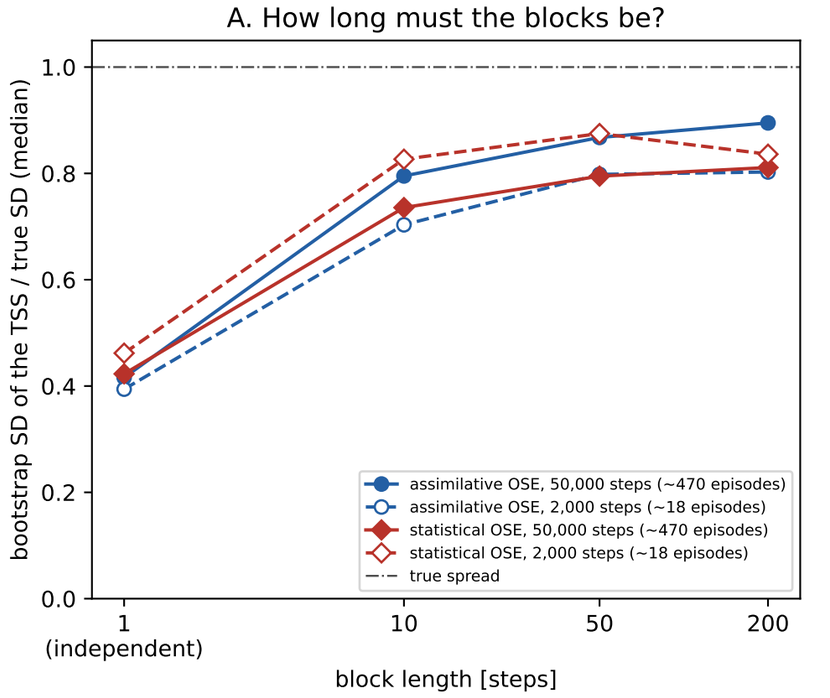
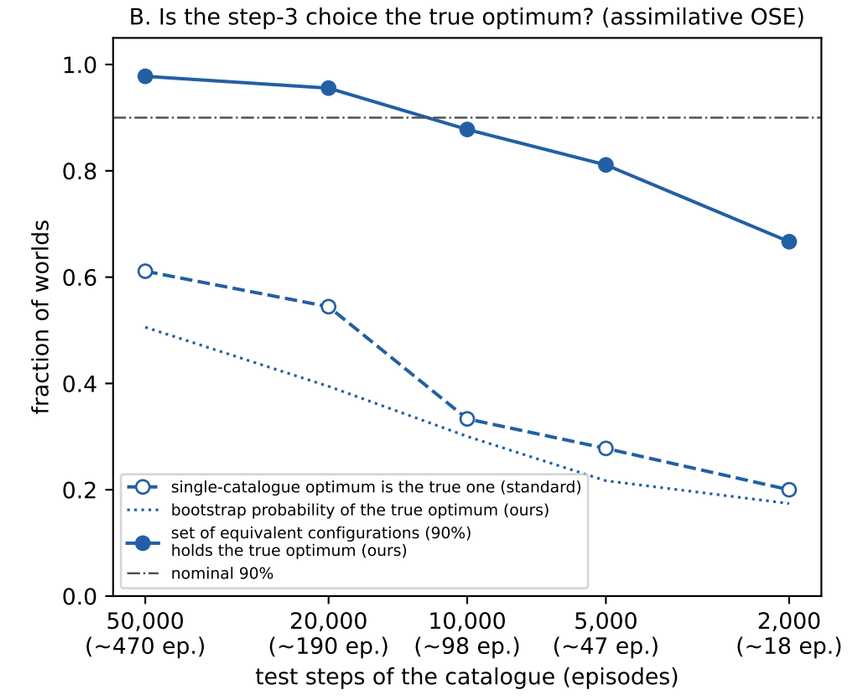
A. Is the uncertainty right?
bootstrap SD of the TSS / true SD
(median, 25–75% over worlds and cases)
1.2
1.0
0.8
0.6
0.4
0.2
0.0
assimilative OSE, independent steps (standard)
assimilative OSE, blocks of 50 steps (ours)
statistical OSE, independent steps (standard)
statistical OSE, blocks of 50 steps (ours)
true spread
50,000 (~470 ep.)
20,000 (~190 ep.)
10,000 (~98 ep.)
5,000 (~47 ep.)
2,000 (~18 ep.)
test steps of the catalogue (episodes)



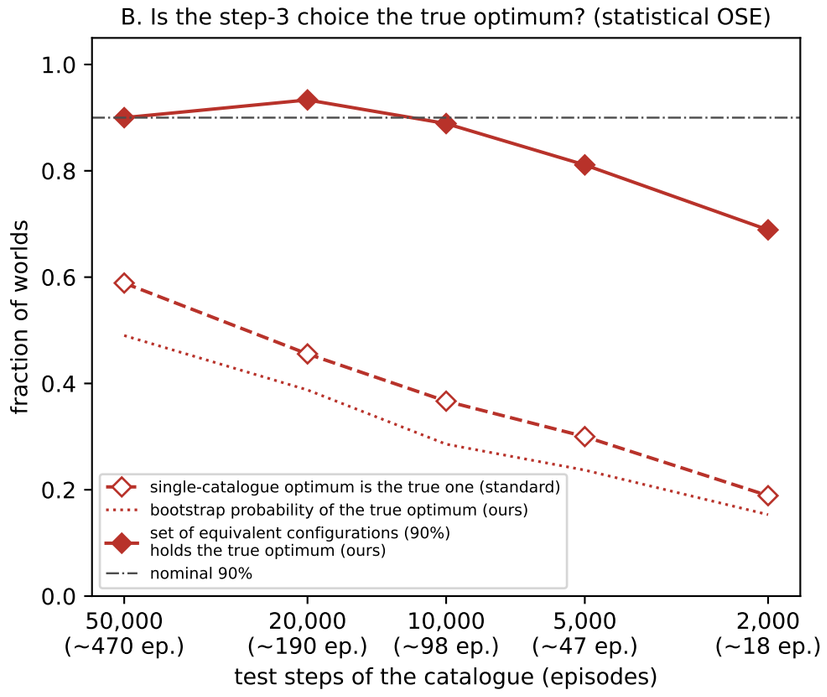
A. Do the intervals hold the true value?
coverage of the 90% intervals
1.0
0.8
0.6
0.4
0.2
0.0
assimilative OSE, independent steps (standard)
assimilative OSE, blocks of 50 steps (ours)
statistical OSE, independent steps (standard)
statistical OSE, blocks of 50 steps (ours)
nominal 90%
50,000 (~470 ep.)
20,000 (~190 ep.)
10,000 (~98 ep.)
5,000 (~47 ep.)
2,000 (~18 ep.)
test steps of the catalogue (episodes)



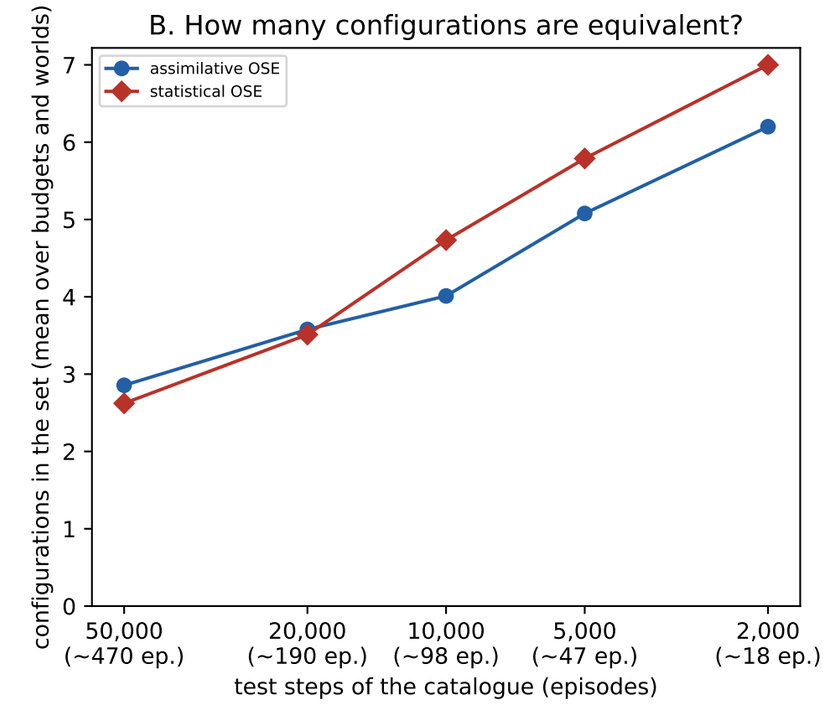
A. How long must the blocks be?
bootstrap SD of the TSS / true SD (median)
1.0
0.8
0.6
0.4
0.2
0.0
assimilative OSE, 50,000 steps (~470 episodes)
assimilative OSE, 2,000 steps (~18 episodes)
statistical OSE, 50,000 steps (~470 episodes)
statistical OSE, 2,000 steps (~18 episodes)
true spread
1
(independent)
10
50
200
block length [steps]



B. Is the step-3 choice the true optimum? (assimilative OSE)
fraction of worlds
1.0
0.8
0.6
0.4
0.2
0.0
single-catalogue optimum is the true one (standard)
bootstrap probability of the true optimum (ours)
set of equivalent configurations (90%)
holds the true optimum (ours)
nominal 90%
50,000 (~470 ep.)
20,000 (~190 ep.)
10,000 (~98 ep.)
5,000 (~47 ep.)
2,000 (~18 ep.)
test steps of the catalogue (episodes)



B. Is the step-3 choice the true optimum? (statistical OSE)
fraction of worlds
1.0
0.8
0.6
0.4
0.2
0.0
single-catalogue optimum is the true one (standard)
bootstrap probability of the true optimum (ours)
set of equivalent configurations (90%)
holds the true optimum (ours)
nominal 90%
50,000 (~470 ep.)
20,000 (~190 ep.)
10,000 (~98 ep.)
5,000 (~47 ep.)
2,000 (~18 ep.)
test steps of the catalogue (episodes)



B. How many configurations are equivalent?
configurations in the set (mean over budgets and worlds)
7
6
5
4
3
2
